

What is claimed is:

1. A print ordering sheet for group members, which is used via a shop when the group member places an order for prints of photographed images stored in an information recording medium shared by the group members, comprising:

a displaying section for displaying a visual list of total printed images produced from the photographed images;

a print order assigning section attached for each printed image on the list;

a control information displaying section for displaying control information relevant to a group;

an identification writing section for writing identification information of the group member; and

an address displaying section for displaying a contact address of the shop which receives the print order from the member.

2. The print ordering sheet of claim 1,

wherein the identification writing section has a column for writing a name and a membership number of at least one of the group members.

3. The print ordering sheet of claim 1,
wherein the control information comprises
a group identification number for identifying the
group, and
an image identification number for identifying the
photographed images,
and wherein the group identification number and the
image identification number are correspondent each other.

4. The print ordering sheet of claim 1,
wherein the print order assigning section has a column for
writing a print size and the number of the prints to be
ordered.

5. The print ordering sheet of claim 1,
wherein the print order assigning section has a column for
producing an information recording medium including
electronic data of the image to be printed.

6. The print ordering sheet of claim 1,
wherein the facsimile number of the shop is displayed
in the address displaying section.

7. The print ordering sheet of claim 1,
wherein the telephone number of the shop is displayed in the
address displaying section.

8. The print ordering sheet of claim 1,
wherein the E-mail address of the shop is displayed in
the address displaying section.

9. The print ordering sheet of claim 1, further comprising
an expiration date displaying section for displaying an
expiration date of the print order.

10. The print ordering sheet of claim 1, further comprising
an additional information displaying section for displaying
additional information.

11. The print ordering sheet of claim 10, wherein the
additional information is an advertisement of the shop or
news of the district.

12. A printing order processing system, comprising:
a registration section for registering information
about a group,

a control information generation section for generating control information which controls group information registered by the registration section and member's common data shared by members of the group,

a producing section for producing an ordering sheet data for ordering prints by performing predetermined process onto the member's common data, based on the control information and the member's common data shared by the members of the group, and

an outputting section for printing out an ordering sheet, based on the ordering sheet data,

wherein the producing section produces the ordering sheet data which includes blank columns for inputting the identification information of the members of the group, and on which the control information produced by the producing section has been recorded.

13. The printing order processing system in claim 12, further comprising:

a member's common data inputting section for inputting the member's common data shared by the members of the group.

14. The printing order processing system in claim 12,
wherein the predetermined process to be performed onto the
member's common data indicates a printing process from the
member's common data, and the producing section produces the
order receiving sheet data for ordering the printing process
of the member's common data.

15. The printing order processing system in claim 12,
wherein the member's common data includes the image
data, and
the producing section produces the ordering sheet data,
using thumbnail images of the image data.
